

Software Engineering

Youssef Ghatas

Coder vs Software Engineer

What is software engineering?

What do you
expect from the
course?

References

- Ref 1: Ian Sommerville, “Engineering Software Products” 1st Edition
- Ref 2: Ian Sommerville, “Software Engineering” 9th Edition
- Other references will be announced later

LOs

- Apply Software Engineering concepts to develop a real project.
- Discriminate between multiple software architecture and design pattern choices.
- Evaluate a software product and identify potential enhancement.
- Design basic software products (as high level).
- Differentiate between traditional and modern approaches for software engineering process including agile and waterfall.

Course Administration

- Email: Youssef.S.Ghatas@gmail.com
- Course Grades (Mainstream):
 - Project: 25
 - Midterm Exam: 5
 - Labs & Lecture participation & in-lecture activities: 10
 - Final Exam: 60
- Course Grades (Credit):
 - Project: 35
 - Midterm Exam: 10
 - Labs: 10
 - In-lecture activities: 5
 - Final Exam: 40

Thank you
